Unilever | indulekha

Elevating Indulekha's Digital Presence

About Project

India's most trusted haircare brand, owned by Hindustan Unilever, Indulekha perfectly address hairfall at the root using centuries of Ayurvedic wisdom, and proven by clinical evidence

Vision

Vision is to be a trusted global leader in natural hair care empowering individuals to achieve their hair health goals

Mission

How can we engage new and returning users, make it mobile friendly and point to nudges at the right time.

Challenges

01

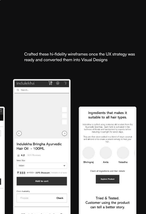
How can we increase conversion rate on mobile? How can we avoid drop-offs from landing pages?

02

How can we engage new and returning users, make it mobile friendly and point to nudges at the right time.

Old UI

Explore the old interface, showing why it needs a big change and pointing out the problems users had

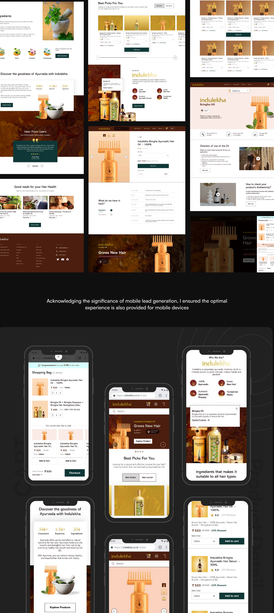


Proposed Sitemap

After finding issues with user experience and analyzing both direct and indirect competitors, we've suggested a new sitemap that aligns with user needs and meets stakeholder requirements

Wireframes

Crafted these hi-fidelity wireframes once the UX strategy was ready and converted them into Visual Designs



Visual Design

Website Revamp

Acknowledging the significance of mobile lead generation, I ensured the optimal experience is also provided for mobile devices
